

CO2 Accounting Report

2019-2021

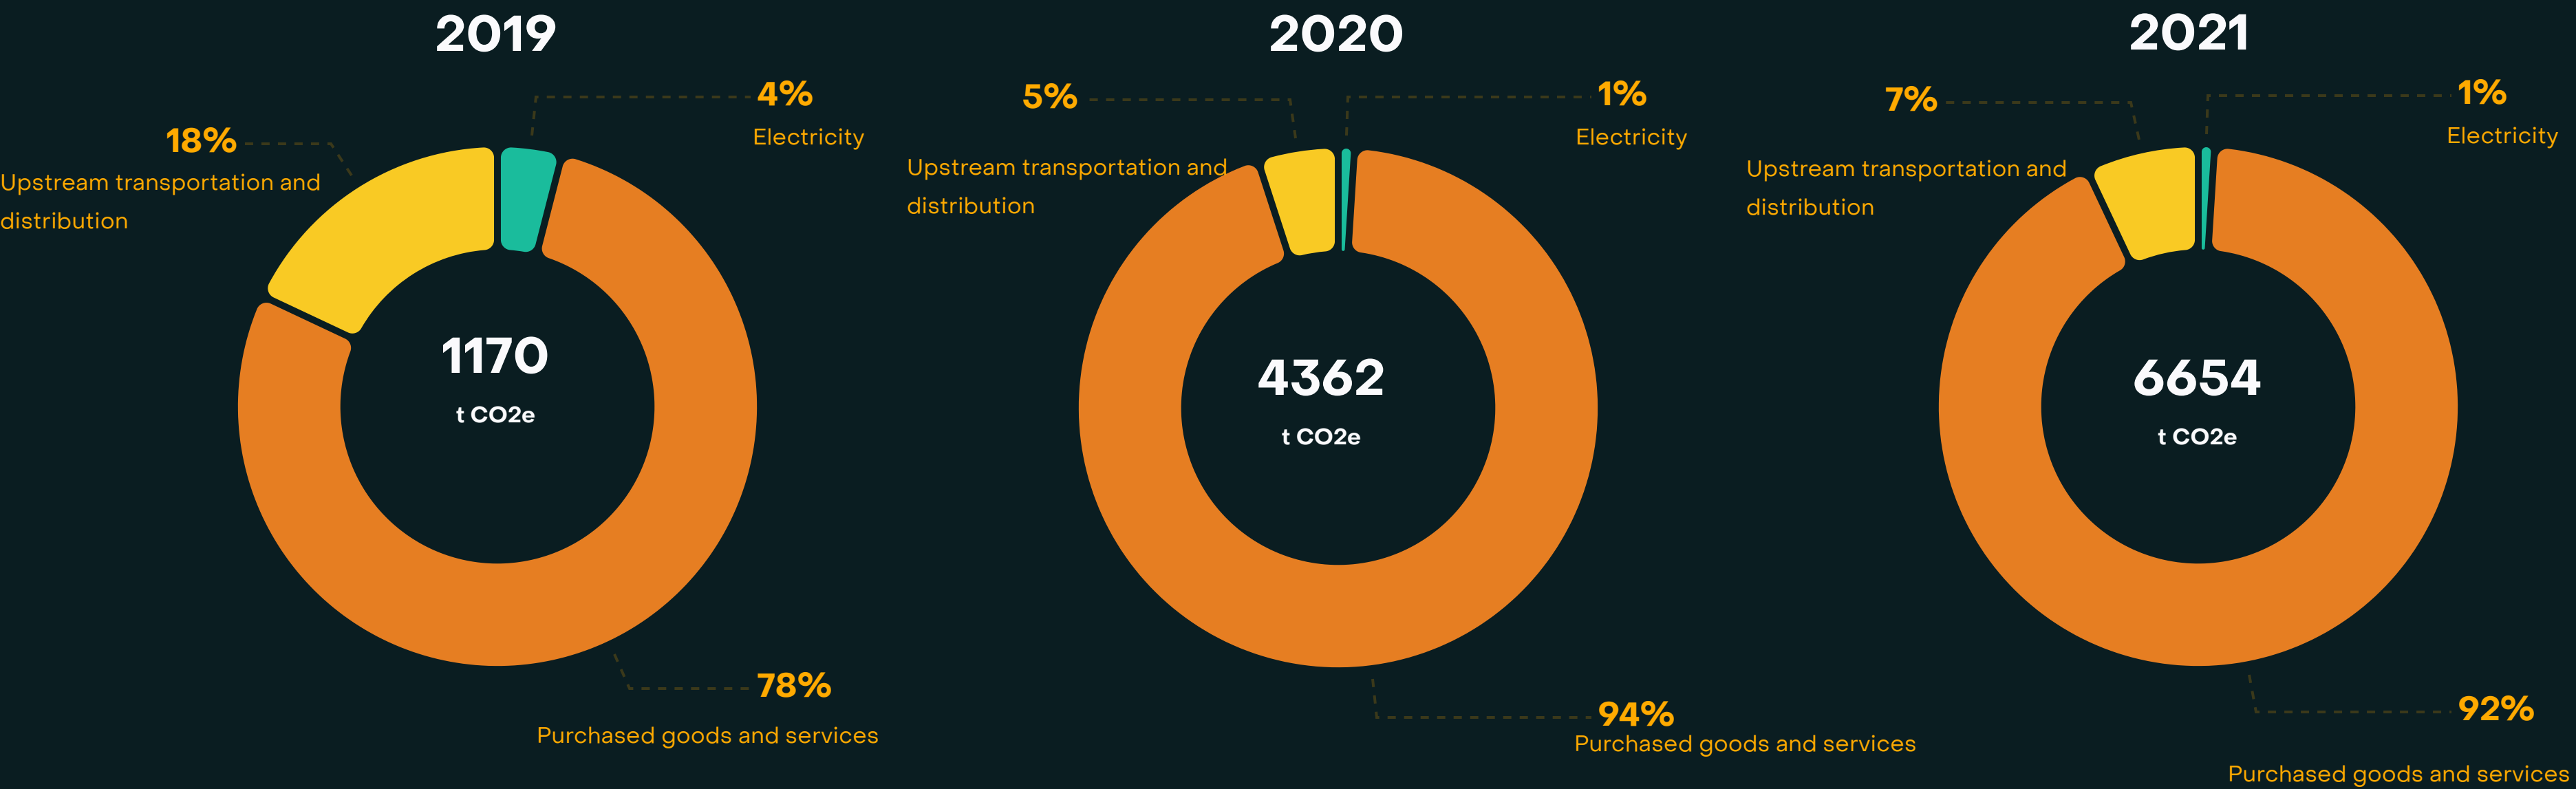

CO2e emissions per month

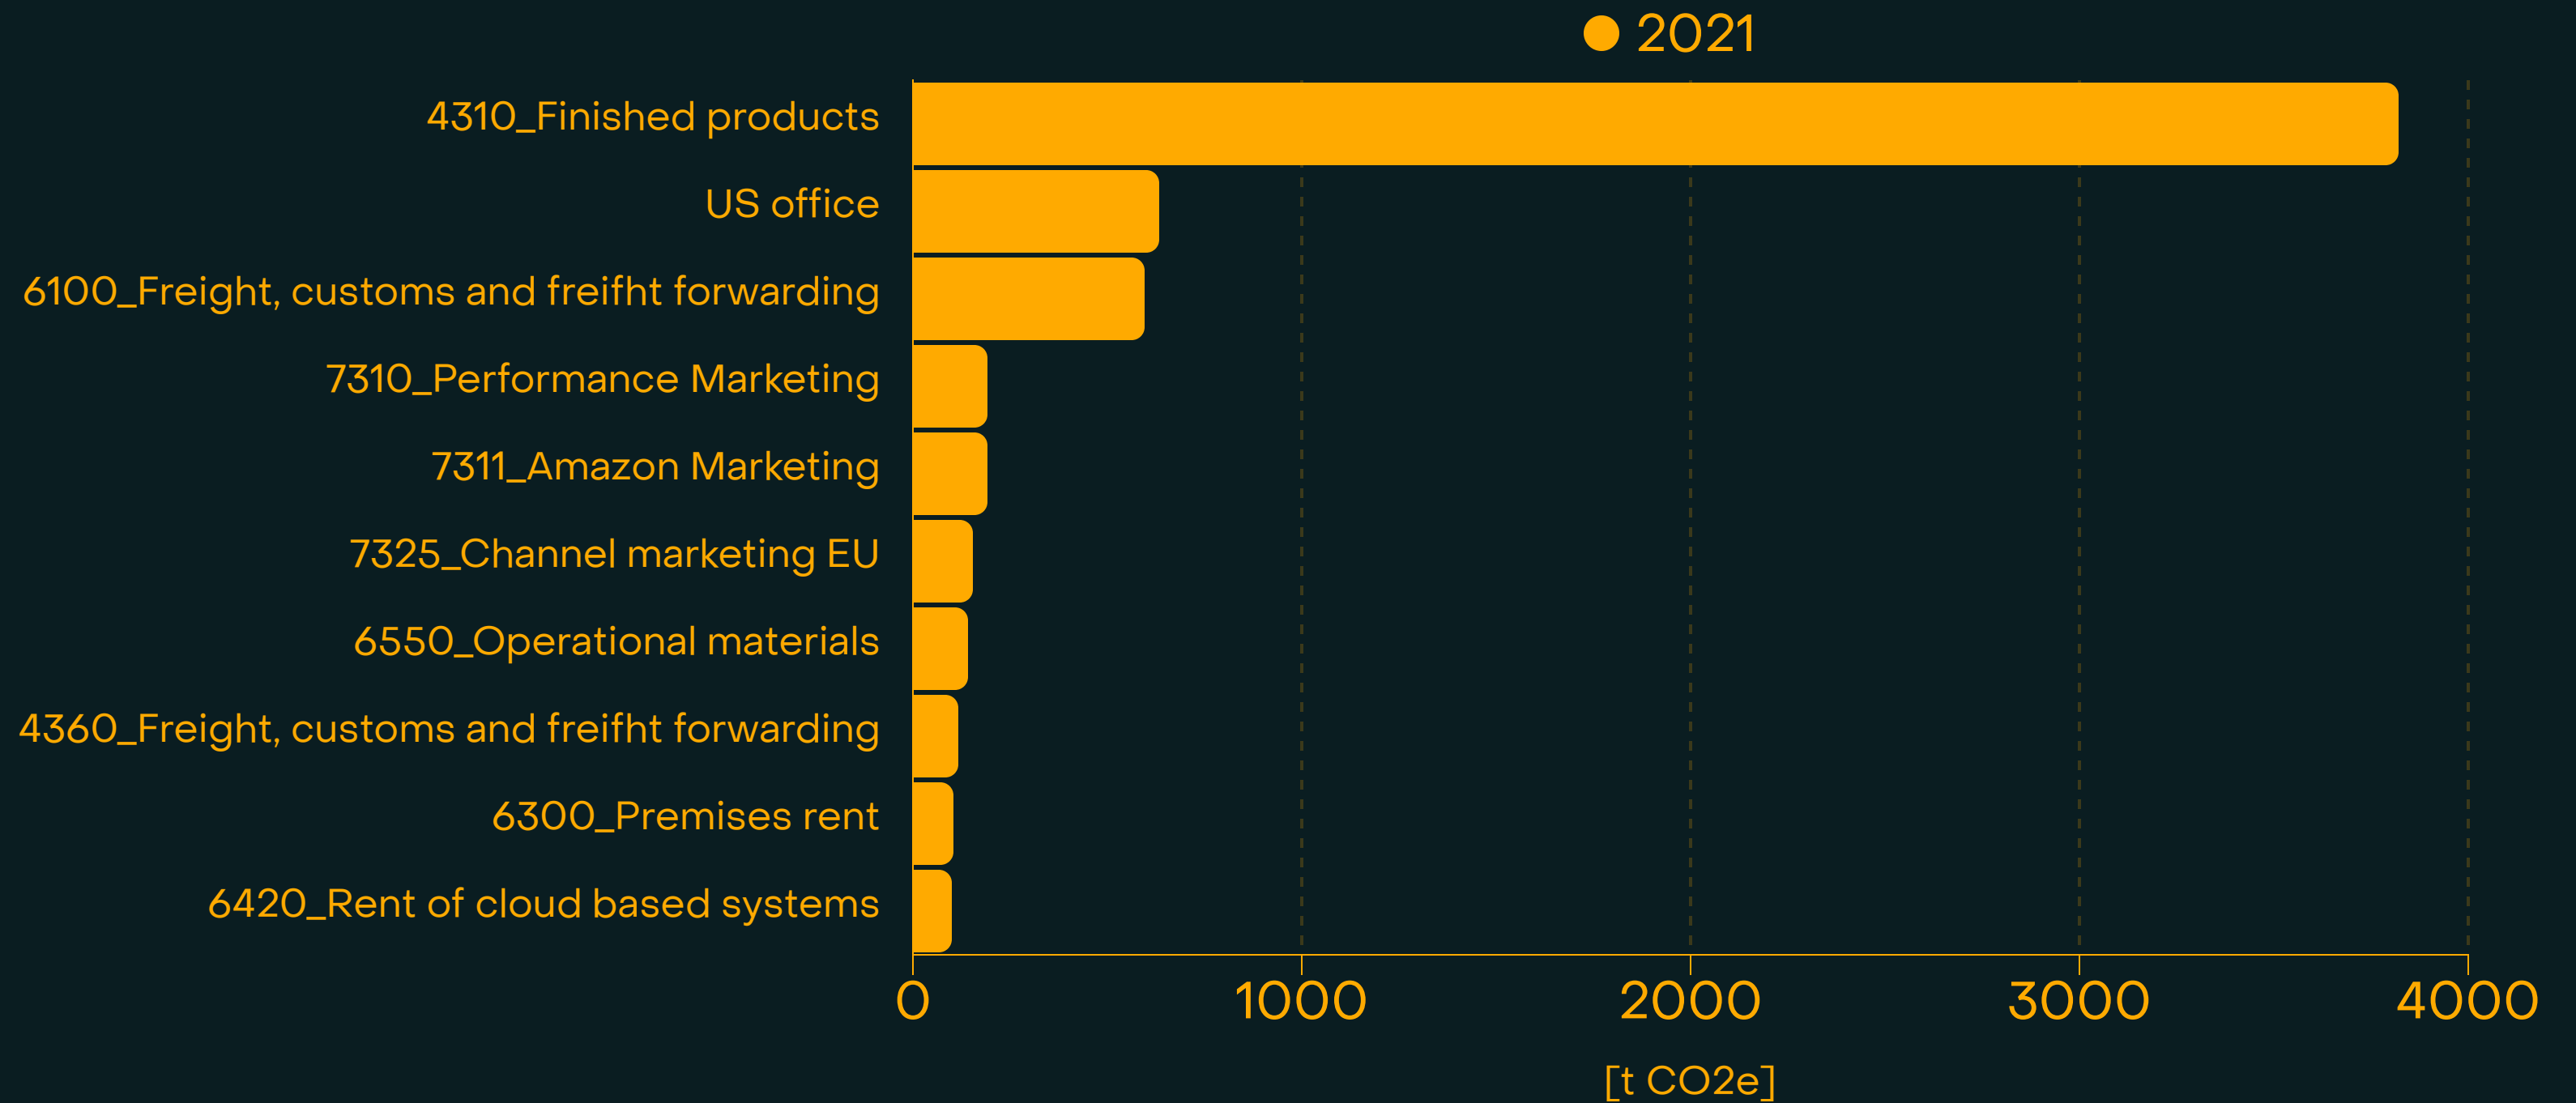

CO2e emissions per quarter

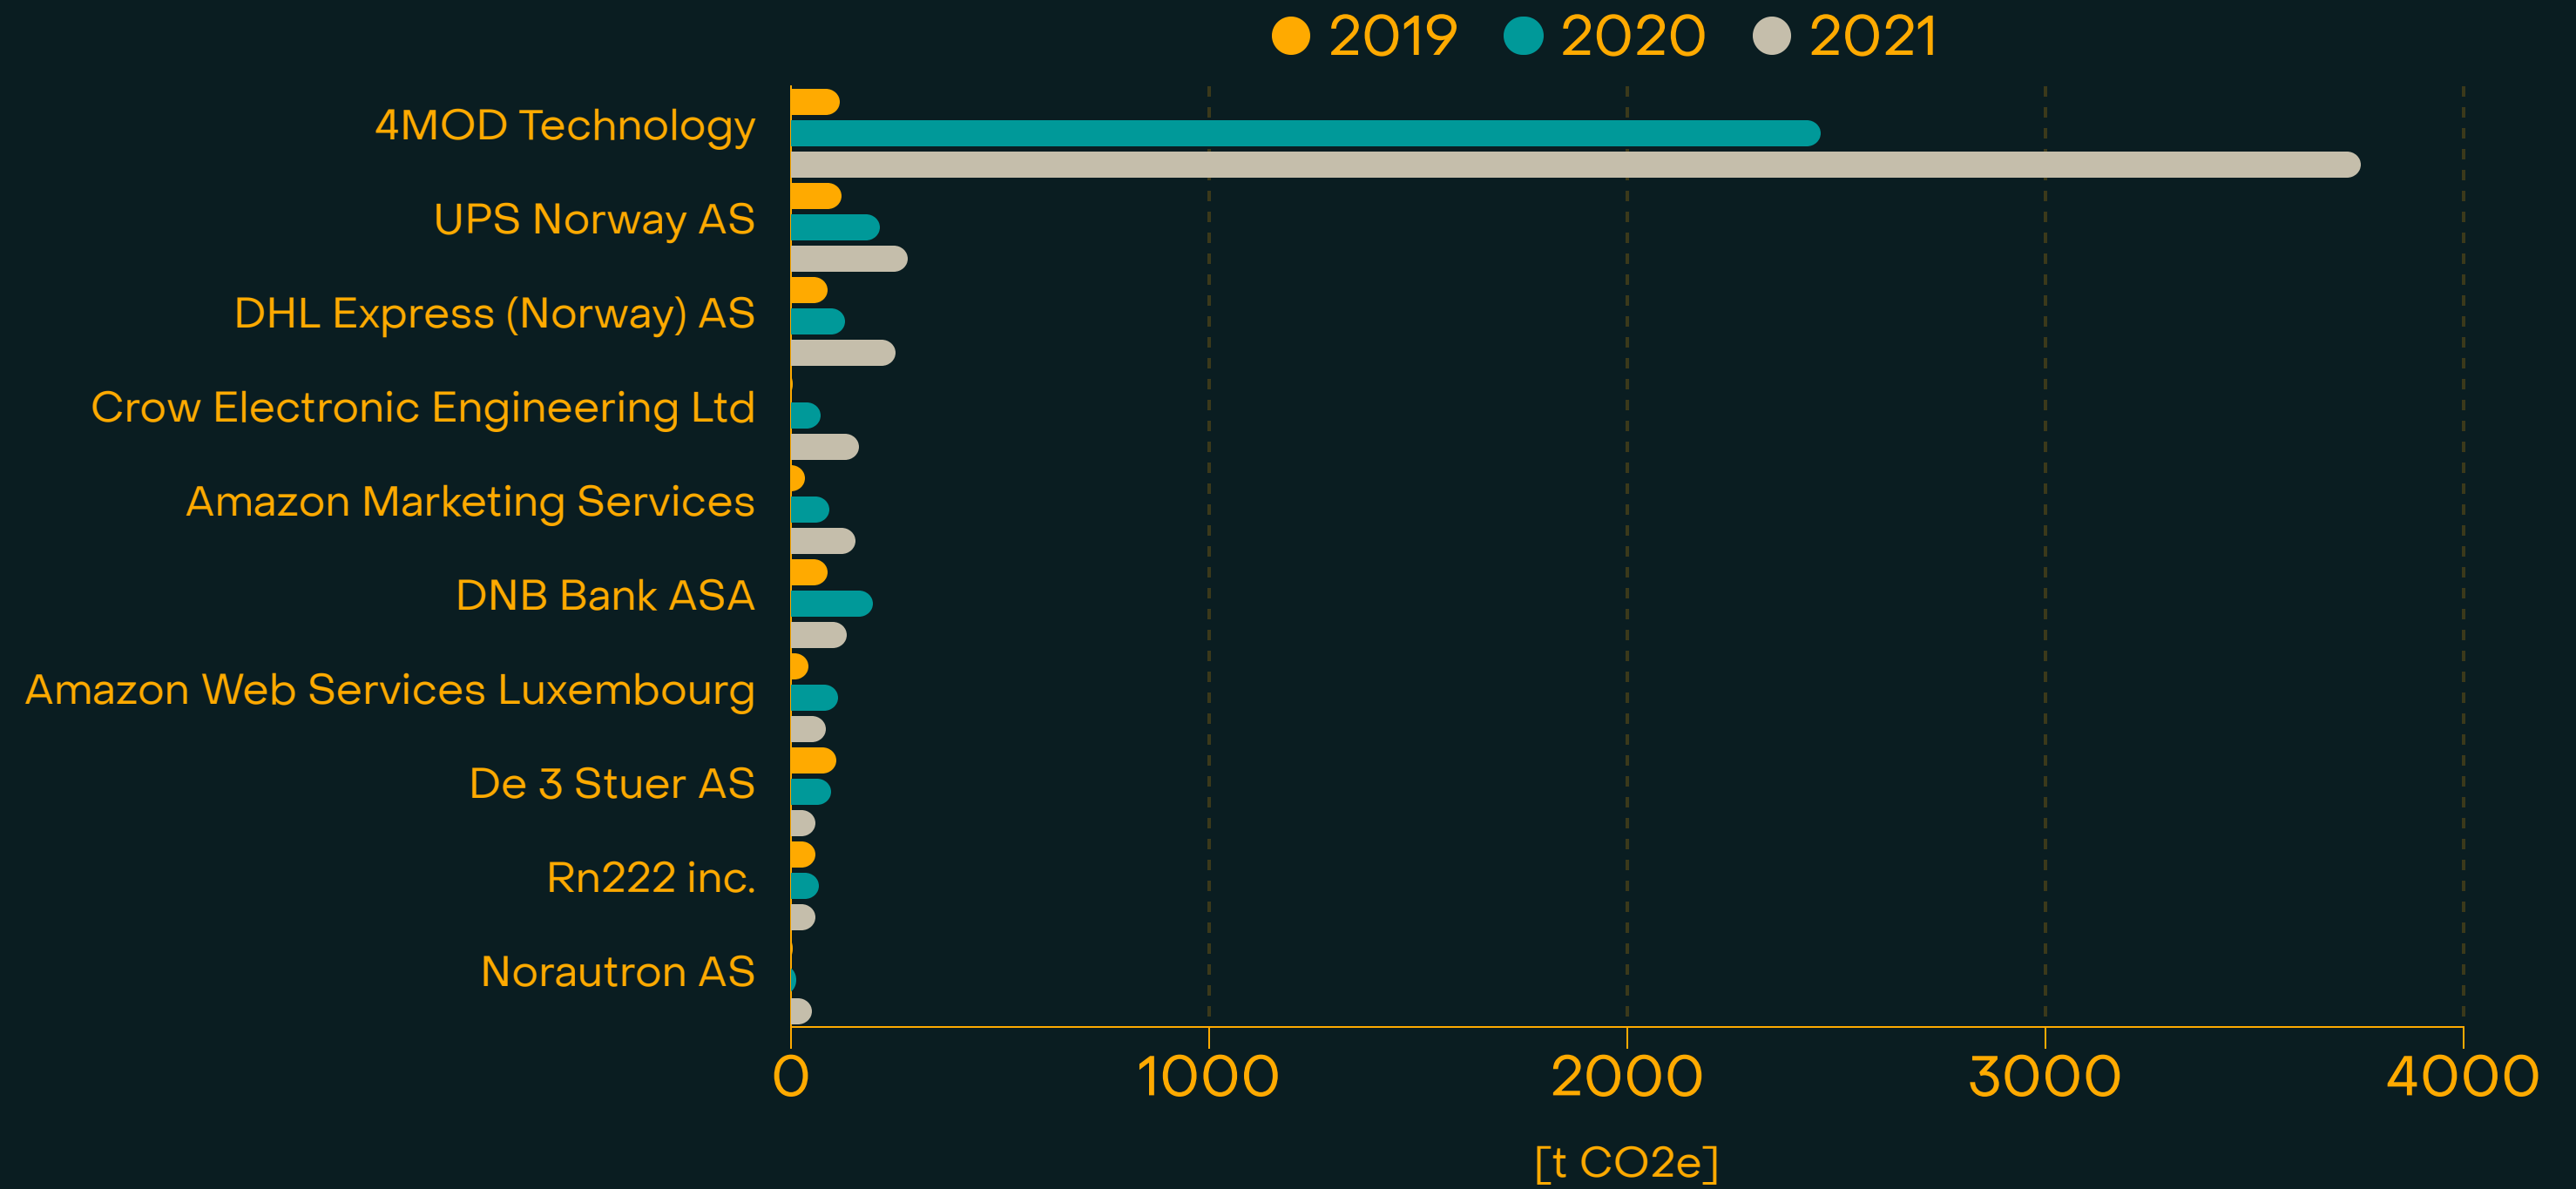

CO2e emissions per GHG scope

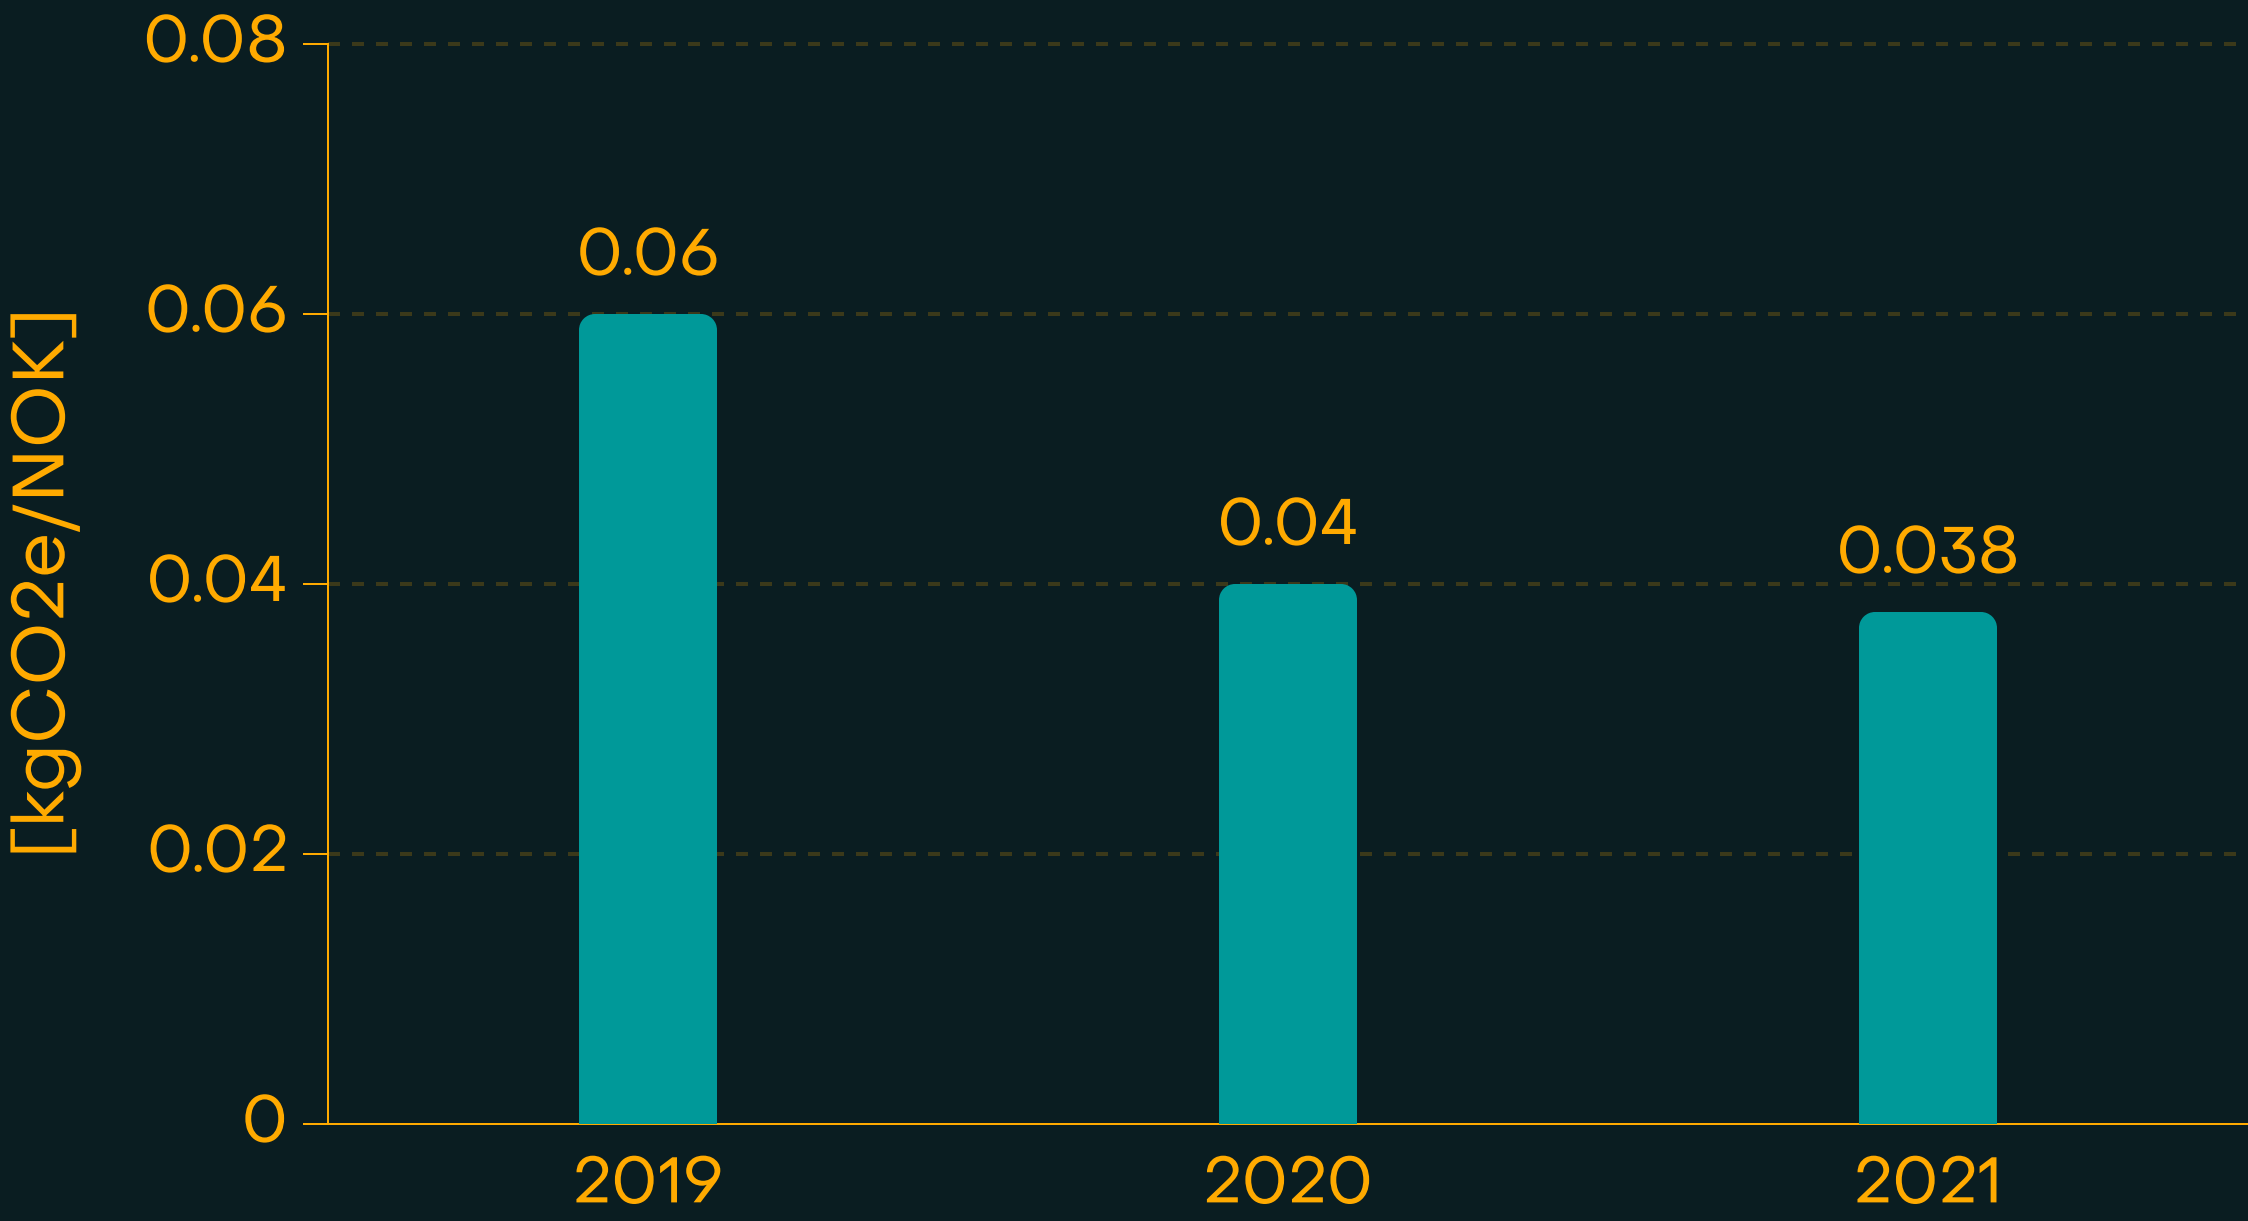

CO2e emissions per general ledger account (top 10)

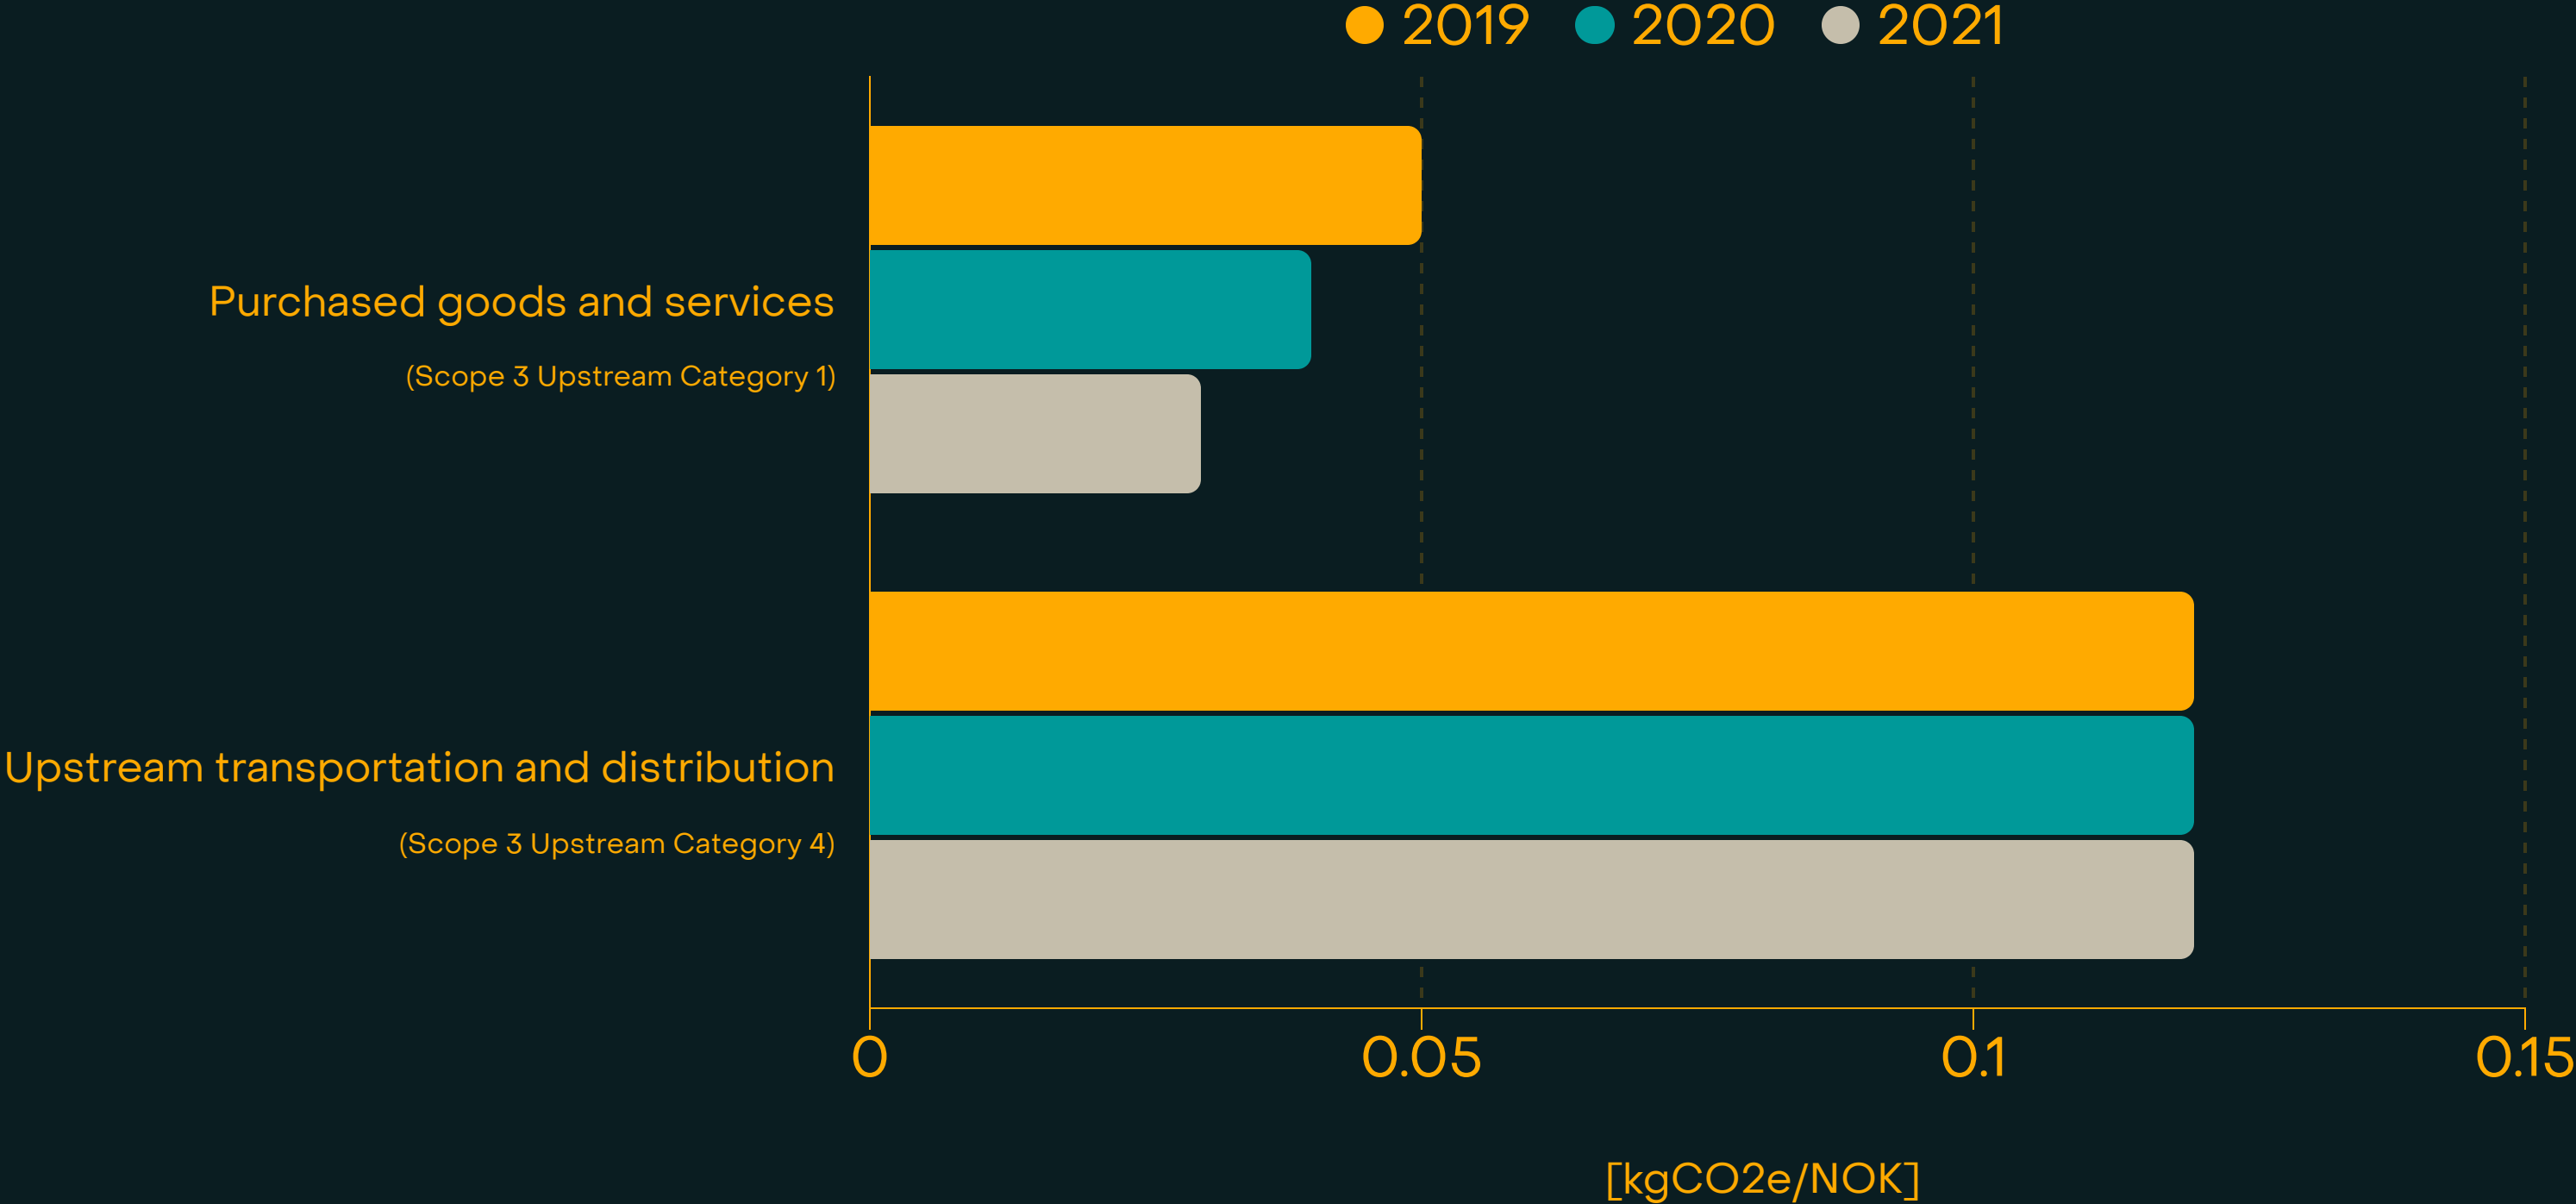

CO2e emissions per supplier (top 10)

CO2e intensity of spend

CO2e intensity of spend per GHG scope in 2019-2020*

*No sufficient data available to compare the numbers to 2021

CO2 emission benchmarks

	2019	2020	2021
t CO2e	1170	4362	6654
New York–Amsterdam roundtrip flights	717	2672	4076
Norwegian citizen's yearly emissions	140	523	798

Report Summary

Company: Airthings AS

Methodology

Variable used spend-based analysis using industry codes as proxy data. The emission factors were converted to NOK using the conversion rate that our source dataset used when constructing the emission factors per USD for each industry code. To adjust for inflation, the emission factors were price adjusted.
